PROJECT EXPERIENCE

Dicoding Batch 6 (React & Back-End)

Apr - jul 2025

- **Role:** UI/UX Designer & Front-End Developer
- **Project Score:** 93.6/100 (**Excellent**)
- **Tools Used:** Figma, React, TailwindCSS, Node.js, HapiJS

Highlights & Responsibilities:

- Designed the complete UI/UX flow of the StuffNudge web app, including user journey, wireframes, and high-fidelity prototypes using Figma.
- Developed the front-end interface using React and TailwindCSS with responsive and accessible design principles.
- Conducted debugging, performance improvements, and code refinements to ensure smooth user experience.
- Applied assessor feedback to enhance navigation structure, consistency, and overall usability of the interface.

Result:

- Successfully completed the project with a final score of 93.6/100
- Received positive feedback from the assessor for the clarity of design, structure, and overall implementation quality.
- Delivered a fully functional and well-designed web application within the required deadline.
